Akiko Green

Summary

Experienced in Full-stack software engineering. Possess strong skills in team-building, organization, and communication skills to drive towards a more efficient and collaborative team. Seeking an opportunity to leverage and build upon my existing experience to drive a positive impact for an organization from an engineering role.

SKILLS

- Working knowledge of Ruby on Rails, SQL, Javascript, React-Redux, Axios, Excel spreadsheets
- Working knowledge Figma

Technical Projects

Just Breathe – <https://github.com/keeks5456/just-breath-frontend>

Just Breath is a web application that is centered on individuals who struggle with anxiety-based mental health issues. Designed to help users practice stress release exercises and to educate them on various anxiety disorders.

- Utilized JSON Web Tokens and localStorage
- Designed a conventional backend with Ruby on rails, built with a personalized seeds API.
- Implemented React-Redux frontend, managing user state to be accessible to call in any component.

QPQ, – <https://github.com/bdb2381/qpq-frontend>

QPQ is a service-for-service trading web application, allowing users to create their profiles and exchange their services for other services.

- Collaborated with 3 other students, creating a web application that trades goods & services.
 - Utilized JSON Web Tokens and localStorage to store encrypted user information client & server-side
 - Managed 5 models, with predominantly many-to-many relationships.
-
